

# CANCER SURVIVORSHIP

## FOR PRIMARY CARE PRACTITIONERS

Are you keen to support your patients who are living with cancer?

### LEARN ONLINE AT YOUR OWN PACE

The University of Melbourne and the Victorian Comprehensive Cancer Centre have developed a new Cancer Survivorship for Primary Care Practitioners massive open online course (MOOC) to ensure busy healthcare providers can stay up to date with leading-edge research, therapies and patient care.

Topics include:

- Survivorship Fundamentals
- Communication and Coordination of Care
- Supportive Care
- Surveillance
- Late and Long-Term Effects
- Palliative Care
- New Cancer Therapies

Current patient experiences and stories feature in the interactive course which launched in July 2018.

### ABOUT US

The Victorian Comprehensive Cancer Centre (VCCC) is an alliance of 10 leading research, clinical and academic institutions with a shared commitment to saving lives through the integration of cancer research, education and patient care.
